

*We change lives!*

## Credit Acceptance Announces Third Quarter 2019 Earnings

November 1, 2019

Southfield, Michigan, Nov. 01, 2019 (GLOBE NEWSWIRE) -- Credit Acceptance Corporation (Nasdaq: CACC) (referred to as the "Company", "Credit Acceptance", "we", "our", or "us") today announced consolidated net income of \$165.4 million, or \$8.73 per diluted share, for the three months ended September 30, 2019 compared to consolidated net income of \$151.0 million, or \$7.75 per diluted share, for the same period in 2018. For the nine months ended September 30, 2019, consolidated net income was \$494.2 million, or \$26.06 per diluted share, compared to consolidated net income of \$422.1 million, or \$21.68 per diluted share, for the same period in 2018.

Adjusted net income, a non-GAAP financial measure, for the three months ended September 30, 2019 was \$168.4 million, or \$8.89 per diluted share, compared to \$147.2 million, or \$7.56 per diluted share, for the same period in 2018. For the nine months ended September 30, 2019, adjusted net income was \$484.9 million, or \$25.56 per diluted share, compared to adjusted net income of \$401.5 million, or \$20.62 per diluted share, for the same period in 2018.

### Webcast Details

We will host a webcast on November 4, 2019 at 8:30 a.m. Eastern Time to answer questions related to our third quarter results. The webcast can be accessed live by visiting the "Investor Relations" section of our website at [creditacceptance.com](http://creditacceptance.com) or by dialing 877-303-2904. Additionally, a replay and transcript of the webcast will be archived in the "Investor Relations" section of our website.

### Consumer Loan Metrics

Dealers assign retail installment contracts (referred to as "Consumer Loans") to Credit Acceptance. At the time a Consumer Loan is submitted to us for assignment, we forecast future expected cash flows from the Consumer Loan. Based on the amount and timing of these forecasts and expected expense levels, an advance or one-time purchase payment is made to the related dealer at a price designed to maximize economic profit, a non-GAAP financial measure that considers our return on capital, our cost of capital and the amount of capital invested.

We use a statistical model to estimate the expected collection rate for each Consumer Loan at the time of assignment. We continue to evaluate the expected collection rate of each Consumer Loan subsequent to assignment. Our evaluation becomes more accurate as the Consumer Loans age, as we use actual performance data in our forecast. By comparing our current expected collection rate for each Consumer Loan with the rate we projected at the time of assignment, we are able to assess the accuracy of our initial forecast. The following table compares our forecast of Consumer Loan collection rates as of September 30, 2019 with the forecasts as of June 30, 2019, as of December 31, 2018 and at the time of assignment, segmented by year of assignment:

Consumer Loan Assignment Year	Forecasted Collection Percentage as of (1)				Current Forecast Variance from		
	September 30, 2019	June 30, 2019	December 31, 2018	Initial Forecast	June 30, 2019	December 31, 2018	Initial Forecast
2010	77.7 %	77.7 %	77.7 %	73.6 %	0.0 %	0.0 %	4.1 %
2011	74.8 %	74.8 %	74.7 %	72.5 %	0.0 %	0.1 %	2.3 %
2012	73.9 %	73.9 %	73.8 %	71.4 %	0.0 %	0.1 %	2.5 %
2013	73.5 %	73.5 %	73.5 %	72.0 %	0.0 %	0.0 %	1.5 %
2014	71.8 %	71.8 %	71.7 %	71.8 %	0.0 %	0.1 %	0.0 %
2015	65.5 %	65.5 %	65.4 %	67.7 %	0.0 %	0.1 %	-2.2 %
2016	64.1 %	64.2 %	64.2 %	65.4 %	-0.1 %	-0.1 %	-1.3 %
2017	65.0 %	65.1 %	65.5 %	64.0 %	-0.1 %	-0.5 %	1.0 %
2018	65.4 %	65.5 %	65.0 %	63.6 %	-0.1 %	0.4 %	1.8 %
2019 (2)	64.8 %	64.7 %	—	64.1 %	0.1 %	—	0.7 %

(1) Represents the total forecasted collections we expect to collect on the Consumer Loans as a percentage of the repayments that we were contractually owed on the Consumer Loans at the time of assignment. Contractual repayments include both principal and interest. Forecasted collection rates are negatively impacted by canceled Consumer Loans as the contractual amount owed is not removed from the denominator for purposes of computing forecasted collection rates in the table.

(2) The forecasted collection rate for 2019 Consumer Loans as of September 30, 2019 includes both Consumer Loans that were in our portfolio as of June 30, 2019 and Consumer Loans assigned during the most recent quarter. The following table provides forecasted collection rates for each of these segments:

2019 Consumer Loan Assignment Period	Forecasted Collection Percentage as of			Current Forecast Variance from	
	September 30, 2019	June 30, 2019	Initial Forecast	June 30, 2019	Initial Forecast
January 1, 2019 through June 30, 2019	65.1 %	64.7 %	64.2 %	0.4 %	0.9 %
July 1, 2019 through September 30, 2019	64.1 %	—	64.0 %	—	0.1 %

Consumer Loans assigned in 2010 through 2013, 2017 and 2018 have yielded forecasted collection results materially better than our initial estimates, while Consumer Loans assigned in 2015 and 2016 have yielded forecasted collection results materially worse than our initial estimates. For Consumer Loans assigned in 2014 and 2019, actual results have been close to our initial estimates. For the three months ended September 30, 2019, forecasted collection rates improved for Consumer Loans assigned in 2019 and were generally consistent with expectations at the start of the period for all other assignment years presented. For the nine months ended September 30, 2019, forecasted collection rates improved for Consumer Loans assigned in 2018 and 2019, declined for Consumer Loans assigned in 2017 and were generally consistent with expectations at the start of the period for all other assignment years presented.

The changes in forecasted collection rates for the three and nine months ended September 30, 2019 and 2018 impacted forecasted net cash flows (forecasted collections less forecasted dealer holdback payments) as follows:

(In millions) Increase (Decrease) in Forecasted Net Cash Flows	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2019	2018	2019	2018
Dealer loans	\$ (4.2)	\$ (0.1)	\$ (0.3)	\$ 3.5
Purchased loans	6.8	17.2	32.6	31.0
<b>Total loans</b>	<b>\$ 2.6</b>	<b>\$ 17.1</b>	<b>\$ 32.3</b>	<b>\$ 34.5</b>

The following table presents information on the average Consumer Loan assignment for each of the last 10 years:

Consumer Loan Assignment Year	Average			Initial Loan Term (in months)
	Consumer Loan (1)	Advance (2)		
2010	\$ 14,480	\$ 6,473		41
2011	15,686	7,137		46
2012	15,468	7,165		47
2013	15,445	7,344		47
2014	15,692	7,492		47
2015	16,354	7,272		50
2016	18,218	7,976		53
2017	20,230	8,746		55
2018	22,158	9,635		57
2019 (3)	22,942	10,098		57

(1) Represents the repayments that we were contractually owed on Consumer Loans at the time of assignment, which include both principal and interest.

(2) Represents advances paid to dealers on Consumer Loans assigned under our portfolio program and one-time payments made to dealers to purchase Consumer Loans assigned under our purchase program. Payments of dealer holdback and accelerated dealer holdback are not included.

(3) The averages for 2019 Consumer Loans include both Consumer Loans that were in our portfolio as of June 30, 2019 and Consumer Loans assigned during the most recent quarter. The following table provides averages for each of these segments:

2019 Consumer Loan Assignment Period	Average			Initial Loan Term (in months)
	Consumer Loan	Advance		
January 1, 2019 through June 30, 2019	\$ 22,740	\$ 10,023		57
July 1, 2019 through September 30, 2019	23,423	10,275		58

Forecasting collection rates accurately at loan inception is difficult. With this in mind, we establish advance rates that are intended to allow us to achieve acceptable levels of profitability, even if collection rates are less than we initially forecast.

The following table presents forecasted Consumer Loan collection rates, advance rates, the spread (the forecasted collection rate less the advance rate), and the percentage of the forecasted collections that had been realized as of September 30, 2019. All amounts, unless otherwise noted, are presented as a percentage of the initial balance of the Consumer Loan (principal + interest). The table includes both dealer loans and purchased loans.

Consumer Loan Assignment Year	As of September 30, 2019			
	Forecasted Collection %	Advance % (1)	Spread %	% of Forecast Realized (2)
2010	77.7 %	44.7 %	33.0 %	99.8 %
2011	74.8 %	45.5 %	29.3 %	99.5 %
2012	73.9 %	46.3 %	27.6 %	99.2 %
2013	73.5 %	47.6 %	25.9 %	98.7 %
2014	71.8 %	47.7 %	24.1 %	97.6 %
2015	65.5 %	44.5 %	21.0 %	93.2 %
2016	64.1 %	43.8 %	20.3 %	81.9 %
2017	65.0 %	43.2 %	21.8 %	64.1 %
2018	65.4 %	43.5 %	21.9 %	38.5 %
2019 (3)	64.8 %	44.0 %	20.8 %	11.2 %

(1) Represents advances paid to dealers on Consumer Loans assigned under our portfolio program and one-time payments made to dealers to

purchase Consumer Loans assigned under our purchase program as a percentage of the initial balance of the Consumer Loans. Payments of dealer holdback and accelerated dealer holdback are not included.

(2) Presented as a percentage of total forecasted collections.

(3) The forecasted collection rate, advance rate and spread for 2019 Consumer Loans as of September 30, 2019 include both Consumer Loans that were in our portfolio as of June 30, 2019 and Consumer Loans assigned during the most recent quarter. The following table provides forecasted collection rates, advance rates and spreads for each of these segments:

2019 Consumer Loan Assignment Period	As of September 30, 2019		
	Forecasted Collection %	Advance %	Spread %
January 1, 2019 through June 30, 2019	65.1 %	44.1 %	21.0 %
July 1, 2019 through September 30, 2019	64.1 %	43.9 %	20.2 %

The risk of a material change in our forecasted collection rate declines as the Consumer Loans age. For 2015 and prior Consumer Loan assignments, the risk of a material forecast variance is modest, as we have currently realized in excess of 90% of the expected collections. Conversely, the forecasted collection rates for more recent Consumer Loan assignments are less certain as a significant portion of our forecast has not been realized.

The spread between the forecasted collection rate and the advance rate has ranged from 20.3% to 33.0%, on an annual basis, over the last 10 years. The spread was at the high end of this range in 2010, when the competitive environment was unusually favorable, and much lower during other years (2015 through 2019) when competition was more intense. The decrease in the spread from 2018 to 2019 was the result of the performance of 2018 Consumer Loans, which has exceeded our initial estimates by a greater margin than those assigned to us in 2019. The decrease in the spread from the first half of 2019 to the third quarter of 2019 was the result of the performance of Consumer Loans assigned to us during the first half of 2019, which has exceeded our initial estimates by a greater margin than those assigned to us during the third quarter of 2019.

The following table compares our forecast of Consumer Loan collection rates as of September 30, 2019 with the forecasts at the time of assignment, for dealer loans and purchased loans separately:

Consumer Loan Assignment Year	Dealer Loans			Purchased Loans		
	Forecasted Collection Percentage as of (1)			Forecasted Collection Percentage as of (1)		
	September 30, 2019	Initial Forecast	Variance	September 30, 2019	Initial Forecast	Variance
2010	77.6 %	73.6 %	4.0 %	78.7 %	73.1 %	5.6 %
2011	74.6 %	72.4 %	2.2 %	76.3 %	72.7 %	3.6 %
2012	73.7 %	71.3 %	2.4 %	75.9 %	71.4 %	4.5 %
2013	73.4 %	72.1 %	1.3 %	74.4 %	71.6 %	2.8 %
2014	71.6 %	71.9 %	-0.3 %	72.6 %	70.9 %	1.7 %
2015	64.8 %	67.5 %	-2.7 %	69.3 %	68.5 %	0.8 %
2016	63.3 %	65.1 %	-1.8 %	66.7 %	66.5 %	0.2 %
2017	64.3 %	63.8 %	0.5 %	66.5 %	64.6 %	1.9 %
2018	65.0 %	63.6 %	1.4 %	66.3 %	63.5 %	2.8 %
2019	64.6 %	64.0 %	0.6 %	65.2 %	64.2 %	1.0 %

(1) The forecasted collection rates presented for dealer loans and purchased loans reflect the Consumer Loan classification at the time of assignment.

The following table presents forecasted Consumer Loan collection rates, advance rates, and the spread (the forecasted collection rate less the advance rate) as of September 30, 2019 for dealer loans and purchased loans separately. All amounts are presented as a percentage of the initial balance of the Consumer Loan (principal + interest).

Consumer Loan Assignment Year	Dealer Loans			Purchased Loans		
	Forecasted Collection % (1)	Advance % (1)(2)	Spread %	Forecasted Collection % (1)	Advance % (1)(2)	Spread %
2010	77.6 %	44.4 %	33.2 %	78.7 %	47.3 %	31.4 %
2011	74.6 %	45.1 %	29.5 %	76.3 %	49.3 %	27.0 %
2012	73.7 %	46.0 %	27.7 %	75.9 %	50.0 %	25.9 %
2013	73.4 %	47.2 %	26.2 %	74.4 %	51.5 %	22.9 %
2014	71.6 %	47.2 %	24.4 %	72.6 %	51.8 %	20.8 %
2015	64.8 %	43.4 %	21.4 %	69.3 %	50.2 %	19.1 %
2016	63.3 %	42.1 %	21.2 %	66.7 %	48.6 %	18.1 %
2017	64.3 %	42.1 %	22.2 %	66.5 %	45.8 %	20.7 %
2018	65.0 %	42.7 %	22.3 %	66.3 %	45.2 %	21.1 %
2019	64.6 %	43.1 %	21.5 %	65.2 %	45.7 %	19.5 %

(1) The forecasted collection rates and advance rates presented for dealer loans and purchased loans reflect the Consumer Loan classification at the time of assignment.

(2) Represents advances paid to dealers on Consumer Loans assigned under our portfolio program and one-time payments made to dealers to

purchase Consumer Loans assigned under our purchase program as a percentage of the initial balance of the Consumer Loans. Payments of dealer holdback and accelerated dealer holdback are not included.

Although the advance rate on purchased loans is higher as compared to the advance rate on dealer loans, purchased loans do not require us to pay dealer holdback.

The spread on dealer loans decreased from 22.3% in 2018 to 21.5% in 2019 as a result of the performance of 2018 Consumer Loans in our dealer loan portfolio, which has exceeded our initial estimates by a greater margin than those assigned to us in 2019. The spread on purchased loans decreased from 21.1% in 2018 to 19.5% in 2019 primarily as a result of the performance of 2018 Consumer Loans in our purchased loan portfolio, which has exceeded our initial estimates by a greater margin than those assigned to us in 2019.

### **Consumer Loan Volume**

The following table summarizes changes in Consumer Loan assignment volume in each of the last seven quarters as compared to the same period in the previous year:

<b>Three Months Ended</b>	<b>Year over Year Percent Change</b>	
	<b>Unit Volume</b>	<b>Dollar Volume (1)</b>
March 31, 2018	18.5 %	32.9 %
June 30, 2018	19.8 %	34.7 %
September 30, 2018	9.4 %	20.3 %
December 31, 2018	5.9 %	12.4 %
March 31, 2019	0.4 %	5.1 %
June 30, 2019	0.0 %	5.6 %
September 30, 2019	0.4 %	7.6 %

(1) Represents advances paid to dealers on Consumer Loans assigned under our portfolio program and one-time payments made to dealers to purchase Consumer Loans assigned under our purchase program. Payments of dealer holdback and accelerated dealer holdback are not included.

Consumer Loan assignment volumes depend on a number of factors including (1) the overall demand for our financing programs, (2) the amount of capital available to fund new loans, and (3) our assessment of the volume that our infrastructure can support. Our pricing strategy is intended to maximize the amount of economic profit we generate, within the confines of capital and infrastructure constraints.

Unit and dollar volumes grew 0.4% and 7.6%, respectively, during the third quarter of 2019 as the number of active dealers grew 10.0% while average unit volume per active dealer declined 9.1%. Dollar volume grew faster than unit volume during the third quarter of 2019 due to an increase in the average advance paid per unit. This increase was the result of an increase in the average size of the Consumer Loans assigned primarily due to increases in the average vehicle selling price and average initial loan term and an increase in purchased loans as a percentage of total unit volume. Unit volume for the one month ended October 31, 2019 declined 6.2% as compared to the same period in 2018.

The following table summarizes the changes in Consumer Loan unit volume and active dealers:

	<b>For the Three Months Ended September 30,</b>			<b>For the Nine Months Ended September 30,</b>		
	<b>2019</b>	<b>2018</b>	<b>% Change</b>	<b>2019</b>	<b>2018</b>	<b>% Change</b>
Consumer Loan unit volume	86,331	86,005	0.4 %	291,788	290,976	0.3 %
Active dealers (1)	9,555	8,684	10.0 %	12,553	11,390	10.2 %
Average volume per active dealer	9.0	9.9	-9.1 %	23.2	25.5	-9.0 %
Consumer Loan unit volume from dealers active both periods	65,264	72,044	-9.4 %	242,418	262,703	-7.7 %
Dealers active both periods	5,900	5,900	—	8,294	8,294	—
Average volume per dealer active both periods	11.1	12.2	-9.4 %	29.2	31.7	-7.7 %
Consumer loan unit volume from dealers <u>not</u> active both periods	21,067	13,961	50.9 %	49,370	28,273	74.6 %
Dealers <u>not</u> active both periods	3,655	2,784	31.3 %	4,259	3,096	37.6 %
Average volume per dealer <u>not</u> active both periods	5.8	5.0	16.0 %	11.6	9.1	27.5 %

(1) Active dealers are dealers who have received funding for at least one Consumer Loan during the period.

The following table provides additional information on the changes in Consumer Loan unit volume and active dealers:

	<b>For the Three Months Ended September 30,</b>			<b>For the Nine Months Ended September 30,</b>		
	<b>2019</b>	<b>2018</b>	<b>% Change</b>	<b>2019</b>	<b>2018</b>	<b>% Change</b>
Consumer Loan unit volume from new active dealers	3,455	3,785	-8.7 %	30,632	30,477	0.5 %
New active dealers (1)	951	936	1.6 %	3,183	3,005	5.9 %
Average volume per new active dealer	3.6	4.0	-10.0 %	9.6	10.1	-5.0 %
Attrition (2)	-16.2 %	-16.7 %		-9.7 %	-11.9 %	

(1) New active dealers are dealers who enrolled in our program and have received funding for their first dealer loan or purchased loan from us during the

period.

(2) Attrition is measured according to the following formula: decrease in Consumer Loan unit volume from dealers who have received funding for at least one dealer loan or purchased loan during the comparable period of the prior year but did not receive funding for any dealer loans or purchased loans during the current period divided by prior year comparable period Consumer Loan unit volume.

The following table shows the percentage of Consumer Loans assigned to us as dealer loans and purchased loans for each of the last seven quarters:

Three Months Ended	Unit Volume		Dollar Volume (1)	
	Dealer Loans	Purchased Loans	Dealer Loans	Purchased Loans
March 31, 2018	70.1 %	29.9 %	67.4 %	32.6 %
June 30, 2018	69.7 %	30.3 %	66.8 %	33.2 %
September 30, 2018	69.5 %	30.5 %	67.0 %	33.0 %
December 31, 2018	69.4 %	30.6 %	67.4 %	32.6 %
March 31, 2019	67.4 %	32.6 %	65.0 %	35.0 %
June 30, 2019	66.7 %	33.3 %	63.7 %	36.3 %
September 30, 2019	67.2 %	32.8 %	64.1 %	35.9 %

(1) Represents advances paid to dealers on Consumer Loans assigned under our portfolio program and one-time payments made to dealers to purchase Consumer Loans assigned under our purchase program. Payments of dealer holdback and accelerated dealer holdback are not included.

As of September 30, 2019 and December 31, 2018, the net dealer loans receivable balance was 63.2% and 65.3%, respectively, of the total net loans receivable balance.

## Financial Results

(Dollars in millions, except per share data)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2019	2018	% Change	2019	2018	% Change
GAAP average debt	\$ 4,230.2	\$ 3,784.2	11.8 %	\$ 4,157.3	\$ 3,558.4	16.8 %
GAAP average shareholders' equity	2,297.8	1,885.6	21.9 %	2,137.4	1,736.7	23.1 %
<b>Average capital</b>	\$ 6,528.0	\$ 5,669.8	15.1 %	\$ 6,294.7	\$ 5,295.1	18.9 %
GAAP net income	\$ 165.4	\$ 151.0	9.5 %	\$ 494.2	\$ 422.1	17.1 %
Diluted weighted average shares outstanding	18,950,866	19,473,978	-2.7 %	18,967,552	19,472,197	-2.6 %
GAAP net income per diluted share	\$ 8.73	\$ 7.75	12.6 %	\$ 26.06	\$ 21.68	20.2 %

The increase in GAAP net income for the three months ended September 30, 2019, as compared to the same period in 2018, was primarily the result of the following:

- An increase in finance charges of 15.5% (\$46.9 million) primarily due to growth in our loan portfolio.
- An increase in operating expenses of 14.3% (\$10.2 million) primarily due to:
  - An increase in salaries and wages expense of 16.5% (\$6.8 million) comprised of the following:
    - An increase of \$4.2 million in cash-based incentive compensation expense primarily due to an improvement in Company performance measures.
    - Excluding the change in cash-based incentive compensation expense, salaries and wages expense increased \$2.6 million, primarily related to our support function primarily as a result of an increase in the number of team members.
  - An increase in general and administrative expense of 22.0% (\$3.1 million) primarily due to increases in legal and building expenses.
- An increase in interest expense of 22.6% (\$9.3 million) due to increases in the average outstanding debt principal balance and our average cost of debt. The increase in the average outstanding debt principal balance was primarily due to borrowings used to fund the growth in our loan portfolio and stock repurchases. The increase in our average cost of debt was primarily the result of a change in the mix of our outstanding debt.
- An increase in provision for income taxes of 13.3% (\$6.3 million) primarily due to an increase in pre-tax income.
- An increase in provision for credit losses of 37.9% (\$5.3 million) primarily due to Consumer Loan performance during the prior year, which improved by a greater margin than during the current year.

The increase in GAAP net income for the nine months ended September 30, 2019, as compared to the same period in 2018, was primarily the result of the following:

- An increase in finance charges of 17.4% (\$150.3 million) primarily due to growth in our loan portfolio.
- An increase in interest expense of 27.0% (\$30.9 million) due to increases in the average outstanding debt principal balance and our average cost of debt. The increase in the average outstanding debt principal balance was primarily due to borrowings used to fund the growth in our loan portfolio and stock repurchases. The increase in our average cost of debt was primarily the result of a change in the mix of our outstanding debt.
- An increase in operating expenses of 13.4% (\$29.0 million) primarily due to an increase in salaries and wages expense of 16.7% (\$20.6 million) comprised of the following:

- An increase of \$13.3 million in cash-based incentive compensation expense primarily due to an improvement in Company performance measures.
- Excluding the change in cash-based incentive compensation expense, salaries and wages expense increased \$7.3 million, primarily related to our support function primarily as a result of an increase in the number of team members.
- An increase in provision for income taxes of 11.0% (\$14.5 million) due to an increase in pre-tax income of 15.6%, partially offset by a decrease in our effective tax rate from 23.8% in 2018 to 22.9% in 2019. The decrease in our effective tax rate is primarily due to an increase in tax benefits related to our stock-based compensation plan, which are recognized during the first quarter of each year.

Adjusted financial results are provided to help shareholders understand our financial performance. The financial data below is non-GAAP, unless labeled otherwise. We use adjusted financial information internally to measure financial performance and to determine incentive compensation. The table below shows our results following adjustments to reflect non-GAAP accounting methods. Material adjustments are explained in the table footnotes and the subsequent "Floating Yield Adjustment" and "Senior Notes Adjustment" sections. Measures such as adjusted average capital, adjusted net income, adjusted net income per diluted share, adjusted interest expense (after-tax), adjusted net income plus interest expense (after-tax), adjusted return on capital, adjusted revenue, operating expenses, and economic profit are all non-GAAP financial measures. These non-GAAP financial measures should be viewed in addition to, and not as an alternative for, our reported results prepared in accordance with GAAP.

Adjusted financial results for the three and nine months ended September 30, 2019, compared to the same periods in 2018, include the following:

(Dollars in millions, except per share data)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2019	2018	% Change	2019	2018	% Change
Adjusted average capital	\$ 6,506.6	\$ 5,658.8	15.0 %	\$ 6,274.9	\$ 5,295.5	18.5 %
Adjusted net income	\$ 168.4	\$ 147.2	14.4 %	\$ 484.9	\$ 401.5	20.8 %
Adjusted interest expense (after-tax)	\$ 39.5	\$ 32.3	22.3 %	\$ 113.7	\$ 89.9	26.5 %
Adjusted net income plus interest expense (after-tax)	\$ 207.9	\$ 179.5	15.8 %	\$ 598.6	\$ 491.4	21.8 %
Adjusted return on capital	12.8 %	12.7 %	0.8 %	12.7 %	12.4 %	2.4 %
Cost of capital	5.8 %	6.2 %	-6.5 %	6.0 %	6.2 %	-3.2 %
Economic profit	\$ 113.2	\$ 91.5	23.7 %	\$ 315.8	\$ 247.0	27.9 %
Diluted weighted average shares outstanding	18,950,866	19,473,978	-2.7 %	18,967,552	19,472,197	-2.6 %
Adjusted net income per diluted share	\$ 8.89	\$ 7.56	17.6 %	\$ 25.56	\$ 20.62	24.0 %

Economic profit increased 23.7% and 27.9% for the three and nine months ended September 30, 2019, as compared to the same periods in 2018. Economic profit is a function of the return on capital in excess of the cost of capital and the amount of capital invested in the business. The following table summarizes the impact each of these components had on the changes in economic profit for the three and nine months ended September 30, 2019, as compared to the same periods in 2018:

(In millions)	Year over Year Change in Economic Profit	
	For the Three Months Ended September 30, 2019	For the Nine Months Ended September 30, 2019
Increase in adjusted average capital	\$ 13.9	\$ 45.6
Increase in adjusted return on capital	1.5	16.6
Decrease in cost of capital	6.3	6.6
<b>Increase in economic profit</b>	<b>\$ 21.7</b>	<b>\$ 68.8</b>

The increase in economic profit for the three months ended September 30, 2019, as compared to the same period in 2018, was primarily the result of the following:

- An increase in our adjusted average capital of 15.0% primarily due to growth in our loan portfolio.
- A decrease in our cost of capital of 40 basis points primarily due to a decrease in the 30-year Treasury rate, which is used in the average cost of equity calculation.

The increase in economic profit for the nine months ended September 30, 2019, as compared to the same period in 2018, was primarily the result of the following:

- An increase in our adjusted average capital of 18.5% primarily due to growth in our loan portfolio.
- An increase in our adjusted return on capital of 30 basis points primarily as a result of the following:
  - An increase in the yield on our loan portfolio increased the adjusted return on capital by 30 basis points primarily due to an improvement in Consumer Loan performance.
  - Slower growth in operating expenses increased the adjusted return on capital by 20 basis points as operating expenses grew by 13.4% while adjusted average capital grew by 18.5%.

The following table shows adjusted revenue and operating expenses as a percentage of adjusted average capital, the adjusted return on capital, and the percentage change in adjusted average capital for each of the last eight quarters, compared to the same period in the prior year:

For the Three Months Ended							
Sept. 30, 2019	Jun. 30, 2019	Mar. 31, 2019	Dec. 31, 2018	Sept. 30, 2018	Jun. 30, 2018	Mar. 31, 2018	Dec. 31, 2017

Adjusted revenue as a percentage of adjusted average capital (1)	21.6%	21.6%	21.9%	21.9%	21.5%	21.3%	21.7%	22.6%

(1) Adjustment to record taxes at our estimated long-term effective income tax rate. The adjustments for periods ended after December 31, 2017 are calculated using a 23% income tax rate, which represents our estimated long-term effective income tax rate. Prior to the enactment of the 2017 Tax Act in December 2017, we used 37% to calculate after-tax adjustments, which was our long-term effective income tax rate for 2017 and prior years.

(2) Net income per share is computed independently for each of the quarters presented. Therefore, the sum of quarterly net income per share

information may not equal year-to-date net income per share.

(3) The enactment of the 2017 Tax Act in December 2017 resulted in the reversal of \$118.5 million of provision for income taxes to reflect the new federal statutory income tax rate, of which \$99.8 million related to the reversal of GAAP provision for income taxes in December 2017 and \$18.7 million related to the reversal of adjusted provision for income taxes in January 2018. This adjustment removes the impact of this reversal from adjusted average capital. We believe the income tax adjustment provides a more accurate reflection of the performance of our business as we are recognizing provision for income taxes at the applicable long-term effective tax rate for the period.

(4) Annualized.

(1) Calculated by dividing GAAP net income by GAAP average shareholders' equity.

(2) Adjusted return on capital is defined as adjusted net income plus adjusted interest expense (after-tax) divided by adjusted average capital.

(3) The cost of capital includes both a cost of equity and a cost of debt. The cost of equity capital is determined based on a formula that considers the

risk of the business and the risk associated with our use of debt. The formula utilized for determining the cost of equity capital is as follows: (the average 30-year Treasury rate + 5%) + [(1 – tax rate) x (the average 30-year Treasury rate + 5% – pre-tax average cost of debt rate) x average debt/(average equity + average debt x tax rate)]. For the periods presented, the average 30-year Treasury rate and the adjusted pre-tax average cost of debt were as follows:

	For the Three Months Ended

Economic profit	\$	315.8	\$	247.0

**Operating expenses**

GAAP salaries and wages	\$	143.9	\$	123.3
GAAP general and administrative		47.9		41.3
GAAP sales and marketing		53.1		51.3
Operating expenses	\$	244.9	\$	215.9

(1) Adjustment to record taxes at our estimated long-term effective income tax rate.

(2) The enactment of the 2017 Tax Act in December 2017 resulted in the reversal of \$118.5 million of provision for income taxes to reflect the new federal statutory income tax rate, of which \$99.8 million related to the reversal of GAAP provision for income taxes in December 2017 and \$18.7 million related to the reversal of adjusted provision for income taxes in January 2018. This adjustment removes the impact of this reversal from adjusted average capital. We believe the income tax adjustment provides a more accurate reflection of the performance of our business as we are recognizing provision for income taxes at the applicable long-term effective tax rate for the period.

(3) Calculated by dividing GAAP net income by GAAP average shareholders' equity.

(4) Adjusted return on capital is defined as adjusted net income plus adjusted interest expense after-tax divided by adjusted average capital.

(5) The cost of capital includes both a cost of equity and a cost of debt. The cost of equity capital is determined based on a formula that considers the risk of the business and the risk associated with our use of debt. The formula utilized for determining the cost of equity capital is as follows: (the average 30-year Treasury rate + 5%) + [(1 - tax rate) x (the average 30-year Treasury rate + 5% - pre-tax average cost of debt rate) x average debt/(average equity + average debt x tax rate)]. For the periods presented, the average 30-year Treasury rate and the adjusted pre-tax average cost of debt were as follows:

	For the Nine Months Ended September 30,	
	2019	2018
Average 30-year Treasury rate	2.7 %	3.0 %
Adjusted pre-tax average cost of debt (6)	4.7 %	4.3 %

(6) Annualized.

**Floating Yield Adjustment**

The purpose of this non-GAAP adjustment is to modify the calculation of our GAAP-based finance charge revenue so that favorable and unfavorable changes in expected cash flows from loans receivable are treated consistently. To make the adjustment understandable, we must first explain how GAAP requires us to account for finance charge revenue, our primary revenue source.

The finance charge revenue we will recognize over the life of the loan equals the cash inflows from our loan portfolio less cash outflows to acquire the loans. Our GAAP finance charge revenue is based on estimates of future cash flows and is recognized on a level-yield basis over the estimated life of the loan. With the level-yield approach, the amount of finance charge revenue recognized from a loan in a given period, divided by the loan asset, is a constant percentage. Under GAAP, favorable changes in expected cash flows are treated as increases to the yield and are recognized over time, while unfavorable changes are recorded as a current period expense. The non-GAAP methodology that we use (the "floating yield" method) is identical to the GAAP approach except that, under the "floating yield" method, all changes in expected cash flows (both positive and negative) are treated as yield adjustments and therefore impact earnings over time. The GAAP treatment results in a lower carrying value of the loan receivable asset, but may result in either higher or lower earnings for any given period depending on the timing and amount of expected cash flow changes.

We believe the floating yield adjustment provides a more accurate reflection of the performance of our business, since both favorable and unfavorable changes in estimated cash flows are treated consistently.

**Senior Notes Adjustment**

On January 22, 2014, we issued \$300.0 million of 6.125% senior notes due 2021 (the "2021 notes") in a private offering exempt from registration under the Securities Act of 1933. On February 21, 2014, we used the net proceeds from the 2021 notes, together with borrowings under our revolving credit facilities, to redeem in full the \$350.0 million outstanding principal amount of our 9.125% senior notes due 2017 (the "2017 notes"). The purpose of this non-GAAP adjustment is to modify our GAAP financial results to treat the issuance of the 2021 notes as a refinancing of the 2017 notes.

Under GAAP, the redemption of the 2017 notes in the first quarter of 2014 required us to recognize a pre-tax loss on extinguishment of debt of \$21.8 million. Under our non-GAAP approach, the loss on extinguishment of debt and additional interest expense that was recognized for GAAP purposes for

the quarter ended March 31, 2014 was deferred as a debt issuance cost and is being recognized ratably as interest expense over the term of the 2021 notes. In addition, for adjusted average capital purposes, the impact of additional outstanding debt related to the one month lag from the issuance of the 2021 notes to the redemption of the 2017 notes was deferred and is being recognized ratably over the term of the 2021 notes.

We believe the senior notes adjustment provides a more accurate reflection of the performance of our business, since we are recognizing the costs incurred with this transaction in a manner consistent with how we recognize the costs incurred when we periodically refinance our other debt facilities.

#### **Cautionary Statement Regarding Forward-Looking Information**

We claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 for all of our forward-looking statements. Statements in this release that are not historical facts, such as those using terms like “may,” “will,” “should,” “believe,” “expect,” “anticipate,” “assume,” “forecast,” “estimate,” “intend,” “plan,” “target” and those regarding our future results, plans and objectives, are “forward-looking statements” within the meaning of the federal securities laws. These forward-looking statements represent our outlook only as of the date of this release. Actual results could differ materially from these forward-looking statements since the statements are based on our current expectations, which are subject to risks and uncertainties. Factors that might cause such a difference include, but are not limited to, the factors set forth in Item 1A of our Form 10-K for the year ended December 31, 2018, filed with the Securities and Exchange Commission on February 8, 2019, other risk factors discussed herein or listed from time to time in our reports filed with the Securities and Exchange Commission and the following:

- Our inability to accurately forecast and estimate the amount and timing of future collections could have a material adverse effect on results of operations.
- We may be unable to execute our business strategy due to current economic conditions.
- We may be unable to continue to access or renew funding sources and obtain capital needed to maintain and grow our business.
- The terms of our debt limit how we conduct our business.
- A violation of the terms of our asset-backed secured financing facilities or revolving secured warehouse facilities could have a material adverse impact on our operations.
- The conditions of the U.S. and international capital markets may adversely affect lenders with which we have relationships, causing us to incur additional costs and reducing our sources of liquidity, which may adversely affect our financial position, liquidity and results of operations.
- Our substantial debt could negatively impact our business, prevent us from satisfying our debt obligations and adversely affect our financial condition.
- Due to competition from traditional financing sources and non-traditional lenders, we may not be able to compete successfully.
- We may not be able to generate sufficient cash flows to service our outstanding debt and fund operations and may be forced to take other actions to satisfy our obligations under such debt.
- Interest rate fluctuations may adversely affect our borrowing costs, profitability and liquidity.
- Reduction in our credit rating could increase the cost of our funding from, and restrict our access to, the capital markets and adversely affect our liquidity, financial condition and results of operations.
- We may incur substantially more debt and other liabilities. This could exacerbate further the risks associated with our current debt levels.
- The regulation to which we are or may become subject could result in a material adverse effect on our business.
- Adverse changes in economic conditions, the automobile or finance industries, or the non-prime consumer market could adversely affect our financial position, liquidity and results of operations, the ability of key vendors that we depend on to supply us with services, and our ability to enter into future financing transactions.
- Litigation we are involved in from time to time may adversely affect our financial condition, results of operations and cash flows.
- Changes in tax laws and the resolution of uncertain income tax matters could have a material adverse effect on our results of operations and cash flows from operations.
- Our dependence on technology could have a material adverse effect on our business.
- Our use of electronic contracts could impact our ability to perfect our ownership or security interest in Consumer Loans.
- Reliance on third parties to administer our ancillary product offerings could adversely affect our business and financial results.
- We are dependent on our senior management and the loss of any of these individuals or an inability to hire additional team members could adversely affect our ability to operate profitably.
- Our reputation is a key asset to our business, and our business may be affected by how we are perceived in the marketplace.
- The concentration of our dealers in several states could adversely affect us.
- Failure to properly safeguard confidential consumer and team member information could subject us to liability, decrease our profitability and damage our reputation.
- A small number of our shareholders have the ability to significantly influence matters requiring shareholder approval and such shareholders have interests which may conflict with the interests of our other security holders.
- Reliance on our outsourced business functions could adversely affect our business.
- Our ability to hire and retain foreign information technology personnel could be hindered by immigration restrictions.
- Natural disasters, acts of war, terrorist attacks and threats or the escalation of military activity in response to these attacks or otherwise may negatively affect our business, financial condition and results of operations.

Other factors not currently anticipated by management may also materially and adversely affect our business, financial condition and results of

operations. We do not undertake, and expressly disclaim any obligation, to update or alter our statements whether as a result of new information, future events or otherwise, except as required by applicable law.

### Description of Credit Acceptance Corporation

Since 1972, Credit Acceptance has offered financing programs that enable automobile dealers to sell vehicles to consumers, regardless of their credit history. Our financing programs are offered through a nationwide network of automobile dealers who benefit from sales of vehicles to consumers who otherwise could not obtain financing; from repeat and referral sales generated by these same customers; and from sales to customers responding to advertisements for our financing programs, but who actually end up qualifying for traditional financing.

Without our financing programs, consumers are often unable to purchase vehicles or they purchase unreliable ones. Further, as we report to the three national credit reporting agencies, an important ancillary benefit of our programs is that we provide consumers with an opportunity to improve their lives by improving their credit score and move on to more traditional sources of financing. Credit Acceptance is publicly traded on the Nasdaq Stock Market under the symbol CACC. For more information, visit [creditacceptance.com](http://creditacceptance.com).
